

## CONTENTS

### Vol. 13, No. 1 (1991)

S. D. Bajpai and A. Y. Al-Hawaj Harold Exton	Application of Bessel polynomial and Meijer's G-function in the study of time-domain synthesis problem A Generalised confluent hypergeometric equation and an application to a class of an harmonic oscillator	1 6
R. K. Jain and Rajendra Jain A. P. Khurana and P. P. Kale	Some common fixed point theorems for nearly densifying maps Some contiguous functions relations for the Kampe De Feriet's function $F_{1,1}^{1,3}$	12 16
Vibhoj Parsai and Brijendra Singh Kamal El Hadi and Sharief Deshmukh G. H. Maikap and P. R. Sengupta S. N. Singh	Fixed points of a pair of mapping in 2-metric spaces On totally real three dimensional submanifolds of $S^6$ On stress concentration around cardioidic hole within an elastic solid as influenced by couple-stress On a second order matrix differential operator	23 27 32 45
<b>Vol. 13 No. 2 (1991)</b>		
Inderjit Kaur Dhillon and Sharda Kumari P. P. Dubey and H. K. Pathak B. B. Singh and R. K. Shukla Harold Exton Chhaya Sharma and C. L. Parihar Subhadra Das Asit Kumar Kundu A. Y. Al Hawaj Nguven Thanh Hai and R. G. Buschman Ashok Ganguly, A. S. Rajput and Late Prof. B. S. Tuteja Namita Srivastava	A queueing model having heterogeneous pair of groups of channels Common fixed point for three mappings under asymptotic regularity A note on the asymptotic behaviour of laminar compressible boundary layer flow over an infinite wing with zero yaw angle in a hypersonic flow Reducible forms of the confluent Huen equation Integral representations of Pochhammer and Mellins' type for hypergeometric functions of four variables Slow unsteady flow of a dusty viscous incompressible fluid between two walls at slightly variable distance from each other Inclusion problems in case of an elastic medium having elastic constants different from its surroundings A new class of two-dimensional expansion for Fox's $H$ -function involving Hermite polynomials and Bessel functions Reduction formulas for the $H$ -functions of two variables Fixed points of probabilistic densifying mappings On dual integral equations associated with Mehler-Fock transform	51 59 64 67 72 80 87 98 104 110 115
