

CONTENTS

Vol. 19, No. 1 (1997)

Anil Kumar and K. K. Jha	On topological tensor products of strict inductive limits of locally convex spaces	1
R. M. Shankhapal, L. B. Thakur, Ajay K. Harihar and S. R. Patel	On modified algorithm for primal-dual linear programming	7
V. H. Pradhan and A. P. Verma	On imbibition equation in the theory of fluid flow through Porous media : A numerical approach	19
C. L. Parihar and Sanjay K. Harne	On a new class of polynomials	31
P. K. Mandal and M. Gupta	On non-linear parametric interaction of acoustic waves in Piezosemiconductors—A numerical approach	37
H. S. P. Shrivastava	Fractional integrals of the generalized Kampe De Feriet functions and the H-function of two variables	47
Jin Han Park, Bu Young Lee and Mi Jung Son	On δ -semiopen sets in Topological space	59
R. K. Mahalanabis and J. Manna	Eigenvalue approach to the problem of Linear Micropolar Thermoelasticity	69
B. K. Lahiri and Dibyendu Banerjee	Relative fix points of entire functions	87
Murat Ozdemir and Sezgin Akbulut	On the subsheaves of the sheaf of the homology groups	99
Harold Exton	Series of Bessel functions of Neumann type	109
D. C. Sanyal and A. K. Maiti	Unsteady Arterial blood flow with mild stenosis	117
Renu Jain and Deepak Kumar Jain	Thermoregulation in human body for cold environmental conditions	125
