

CONTENTS VOL. 2.

NUMBER 1.

M. C. BAGCHI AND D. K. SINHA	: Some aspects of biomechanical problems on fracture mechanics parameters in tensile forces.	... 1
J. N. KAPUR	: Comparison on discrete-time and continuous-time discrete-age-scale models in population dynamics.	... 8
K. K. MISHRA AND K. G. SHARMA	: On strong summability of ultraspherical series.	... 18
ASHOK GANGULY	: On the matrix summability of Fourier series.	... 23
PUSHPA MALAVE AND B. R. BHONSLE	: Some recurrence relations and differential formulae for two variable orthogonal polynomials ${}_2P_{n,k}^\alpha(x, y)$ which are orthogonal over the unit disk-I	... 31
P. L. SHUKLA	: Effect of Hall current on the hydromagnetic annular flow subject to a non-symmetric magnetic field.	... 36
LALLU SINGH	: The general proof of Fermat's last theorem.	... 43

NUMBER 2.

S. G. DANDAPATH	: A note on a variational method for electrothermoelastic vibration analysis.	... 51
V. M. BHISE AND SAROJINI K.	: On a new class of integral operators.	... 59
G. PARIA AND G. AHMED	: Stochastic vibration of beam with the effect of shear deformation.	... 63
Y. N. PRASAD AND R. PATI	: Some integral representations of the modified multi-dimensional Whittaker transform.	... 75
B. K. KARANDE	: Generating functions for classical orthogonal polynomials by Fujiwara-Thakare method.	... 82
BHAGAT SINGH	: Non oscillation of forced Liénard-type functional equations.	... 85
R. N. JAIN	: Sum of a well-poised ${}_4F_3(1)$ 91
