

## CONTENTS VOL. 3.

### NUMBER 1.

S. K. DEY	: On Transient Mappings.	... 1
S. DAS	: On an aspect of Bio-diffusion.	... 11
K. K. KUNDU	: Disturbances in a semi-infinite piezoelectric solid under the influence of time-dependent flow of heat.	... 16
MADHAVI DIGHE AND V. M. BHISE	: On the generalisation of Beesack's extension of Opial inequality.	... 22
R. K. PAL AND M. GUPTA	: Parametric interaction of ultrasonic waves in Dissipative Piezosemiconductors.	... 27
R. K. JAIN AND A. GANGULY	: On some relations between strong and ordinary almost Borel type methods of summability.	... 37
A. R. CHAURASIA	: Weak convergence of measures on separable Banach spaces.	... 40
O. P. TANDON	: Conversion Formulas.	... 45
P. P. KALE AND AMITA PUROHIT	: The uniqueness of de Sitter's solution.	... 49

### NUMBER 2.

R. G. BUSHMAN	: H-function Transformation chains.	... 1
B. G. PACHPATTI	: Fixed point theorems for mappings satisfying a new functional inequality.	... 6
K. K. SHRIVASTAVA	: On summability [C, K] and summability [R, K] of ultraspherical series.	... 9
SNIGDHA BANERJEE	: Note on Torsional Vibration of a composite non-homogeneous circular cylinder of finite length.	... 14
A. CHAKRABARTY AND JAYASHRI RAY	: Random torsional Vibration of an elastic circular cylinder.	... 18
A. CHAKRABARTY AND T. BANDOPADHYAY	: Elastic field in composite non-homogeneous spherical bodies under uniform pressure on the boundary or under gravitational attractive force.	... 22
S. K. PAUL AND SUSANTA ROY	: On an aspect of optimal exploitation or renewable resources-A Competitive Economy.	... 26
R. C. BOHARA AND U. C. JAIN	: Differentiation formulae involving multiple H-functions.	... 32
M. K. SHRIVASTAVA	: Piecewise approximation of Non-linear characteristics.	... 37
LAL BHADUR	: Finding out best approximations from closed zero-hyper planes in normed linear spaces.	... 41
P. C. JAIN	: Some results on Mehler-Fock transform.	... 43
V. M. BHISE AND A. G. LAGOO	: On the positivity of some ${}_1F_2$ 's	... 51
C. L. PARIHAR AND S. M. JAIN	: F-equations of two variables.	... 55
