

## CONTENTS VOL. 4

### NUMBER-1

V. ZISSIS AND C. LASCARIDES	: A note on the solution of a convolution equation with trigonometric kernel.	1
P. N. INDURKAR AND R. K. SAXENA	: Substitution theorems for two dimensional general transform with symmetric kernel.	10
A. NAUTIYAL AND S. R. H. RIZVI	: On the approximation of an entire function in $L^{\alpha}$ -norm.	16
R. S. GARG	: On general multiple transformation involving the multi-variable H-function with applications.	21
S. K. MONDAL	: Electrohydrodynamic surface waves in deep water due to arbitrary surface disturbances.	30
R. S. PATHAK AND B. N. UPADHYAY	: Unsteady dusty fluid flow through a circular pipe under transverse magnetic field.	39
N. K. AGARWAL	: Stokes flow past a sphere with a source at its centre in a porous medium.	48
S. K. JAIN AND E. N. ONWUCHEKWA	: A $q$ - dimensional unsteady spherical flow of an ideal gas through a porous medium.	53
R. C. BOHARA AND U. C. JAIN	: Infinite series relations involving multivariable H-function.	58
M. S. CHOUDHARI	: $n$ - dimensional Hankel transforms of arbitrary order.	63

### NUMBER-2

R. G. BUSCHMAN	: Factorization of H-functions.	69
RINA GHOSH	: On studies in injected current leading to some time-dependent membrane potential with a myelinated fibre.	74
ASHOK GANGULY	: Fixed point theorem on two Banach space.	80
B. M. AGRAWAL AND RENU JAIN	: Dynamical symmetry algebra of ${}_2F_1$ and Jacobi polynomials.	82
L. M. TRIPATHI AND V. N. TRIPATHI	: On $ \bar{N}, P_n $ —Summability factors of an infinite series.	90
Y. N. PRASAD AND A. K. SINGH	: Basic properties of the transform involving an H-function of $r$ variables as kernel.	94
R. N. MUKHERJEE	: On fixed points of single-valued and set-valued mappings.	101
H. C. MADHEKAR	: Some results in unified form for classes of generalised Bernoulli, Euler and related polynomials.	104
HAROLD EXTON	: Hypergeometric functions of three variables.	113
BIMALENDU DAS	: Two dimensional thermoelastic stresses due to disturbance produced by a periodic heat nucleus.	120
