

CONTENTS

VOL. 6, NUMBER-1

| | | |
|------------------------------------|--|----|
| Y. N. PRASAD AND U. S. MISHRA | : Expansion formulae for the modified H-function of r variables | 1 |
| S. P. GOYAL AND R. S. GARG | : On partial derivatives of the H-function of two variables | 8 |
| SHYAMASREE DASGUPTA | : Torsional vibration of a semi-infinite non-homo- geneous elastic medium | 14 |
| SANTI MUKHERJEE | : Radial vibration of an orthotropic spherical shell | 17 |
| MALA GANGULY | : Danilovskaya's problem in a semi-infinite piezo- electric rod with random distribution of density | 21 |
| K. SAROJINI AND V. M. BHISE | : Weighted norm inequalities for integral operators | 29 |
| A. G. LAGOO | : Inequalities for Srivastava's H_A, H_B, H_C functions | 39 |
| P. N. INDURKAR AND R. K. SAXENA | : Some properties of generalised Kummer's transform of two variables | 44 |
| LAL BHADUR AND C. B. NIGAM | : A generalisation of exercise of N. Jacobson | 51 |
| B. C. DHAGE | : On certain maps with non-unique fixed point | 55 |

VOL. 6, NUMBER-2

| | | |
|------------------------------------|--|-----|
| K. N. BHAUMIK AND S. K. KUNDU | : On restricted measurability | 63 |
| SANJUKTA NANDY | : Heating of an infinite piezoelectric solid by instantaneous heat sources with thermal relaxation | 73 |
| S. K. MOHARIR | : A theorem on the generalised Whittaker transform | 85 |
| R. D. BHARGAVA AND H. S. SAXENA | : Problem of circular elastic inclusion perturbing uniform heat flow in an infinite elastic medium under generalised plane strain conditions | 91 |
| R. K. JAIN AND S. K. BOHRE | : Some results on non-unique fixed points | 103 |
| B. P. REDDY AND M. S. CHOUDHARY | : On self reciprocal distributions | 109 |
| G. S. SRIVASTAVA AND N. KUMAR | : Some growth estimates of analytic functions and their derivatives | 115 |
| S. P. DIXIT | : On pairwise contractive mappings in Hausdorff spaces | 125 |
| JOSEPH WAYNE SMITH | : On a divergent series | 129 |
| R. K. JAIN AND M. K. RAJORIYA | : Some common fixed point theorems for three mappings in metric spaces | 133 |
