CONTENTS

Vol. 13, No. 1 (1991)

S. D. Bajpai and A. Y. Al-Hawaj	Application of Bessel polynomial and Meijer's G-function in the study of time-domain synthesis problem	1
Harold Exton	A Generalised confluent hypergeometric equation and an application to a class of an harmonic oscillator	6
R. K. Jain and Rajendra Jain	Some common fixed point theorems for nearly densifying maps	12
A. P. Khurana and P. P. Kale	Some contiguous functions relations for the Kampe De Feriet's function $F_{1,1}^{1,2}$	16
Vibhoj Parsai and Brijendra Singh	Fixed points of a pair of mapping in 2-metric spaces	23
Kamal El Hadi and Sharief Deshmukh	On totally real three dimensional submanifolds of S^6	27
G. H. Maikap and P. R. Sengupta	On stress concentration around cardioidic hole within an elastic solid as influenced by couple-stress	32
S. N. Singh	On a second order matrix differential operator	45

Vol. 13 No. 2 (1991)

Inderjit Kaur Dhillon and Sharda Kumari	A queueing model having heterogeneous pair of groups of channels	51
P. P. Dubey and H. K. Pathak	Common fixed point for three mappings under asymptotic regularity	59
B. B. Singh and R. K. Shukla	A note on the asymptotic behaviour of laminar compressible boundary layer flow over an infinite wing with zero yaw angle in a hypersonic flow	64
Harold Exton	Reducible forms of the confluent Huen equation	67
Chhaya Sharma and C. L. Parihar	Integral representations of Pochhammer and Mellins' type for hypergeometric functions of four variables	72
Subhadra Das	Slow unsteady flow of a dusty viscous incompressible fluid between two walls at slightly variable distance from each other	80
Asit Kumar Kundu	Inclusion problems in case of an elastic medium having elastic constants different from its surrondings	87
A. Y. Al Hawaj	A new class of two-dimensional expansion for Fox's *H*-function involving Hermite polynomials and Bessel functions	98
Nguven Thanh Hai and R. G. Buschman	Reduction formulas for the *H*-functions of two variables	104
Ashok Ganguly, A. S. Rajput and Late Proof. B. S. Tuteja	Fixed points of probabilistic densifying mappings	110
Namita Srivastava	On dual integral equations associated with Mehler-Fock transform	115
