ONTENTS

Vol. 16, No. 1 (1994)

Suman Jain, R. P. Gupta and B. Singh	Almost periodic functions defined on semigroups with values in a 2-metric space over topological semifield	1
B. P. Reddy and M. S. Chaudhary	On distributional transforms and slowing down of neutrons	9
Prem Chandra and Miss Rajshree Pandya	Multipliers for absolute cesáro summability of a fourier series	19
T. Dixit and Sunil Kumar	Distribution functions in the statistical theory of MHD turbulence	31
S. K. Majumder and D. C. Sanyal	Steady laminar flow through a tube of section bounded by a hyperbola and two parallel straight lines	41
S. Sampath Kumar	On pairwise $\mathscr{A}$-continuous functions	50
S. Das Gupta and Sutapa Chaudhari	Effect of transverse magnetic field on arterial blood-flow	56
Samy A. Youssef and S. G. Hulsurkar	Girth of graphs on weyl groups	66
U. C. De and G. Pathak	On p-sasakian manifolds satisfying certain conditions	72
S. R. Kulkarni and S. B. Joshi	Integrals of subfamily of meromorphially univalent functions with negative coefficients	78
Himanshu Pandey	Study of a probability model on migration	87
P. S. Kantawala and S. R. Agrawal	On $(\bar{N}, p_n)$ summability of orthogonal series	91
V. S. Sankhla S. S. Tak and P. K. Bhatia	MHD flow near an assymmetric plane stagnation point over a permeable wall with suction	103
D. K, Wagh and S. D. Wagh	The stochastic variation of blood glucose	111
H. S. P. Shrivastava	Some infinite integrals and recurrence relations for generalized function of two variables	116
C. S. Babar and G. S. Pandey	On approximation to a function by nörlund means of its ultraspherical series on a sphere	127

CONTENTS

Vol. 16, No. 2 (1994)

Prem Chandra and Miss Varsha Kshirsagar	Absolute nörlund summability of fourier-jacobi series at frontier point	135
S. R. Kulkarni and U. H. Naik	Convolution properties of some univalent functions wtih negative coefficients	145
M. N. Mehta	An approximate solution of double phase flow due to differential wettability	157
R. K. Saxena and Jeta Ram	Fractional integral operators associated with a general class of polynomials	163
C. K. Sharma and N. D. Gupta	Double series relations for the *I*-function of two variables	172
S. N. Singh	Fun with numbers (I)	177
Sikha Ghosh (Dutta) and D. C. Sanyal	Unsteady flow of a dusty viscous incompressible fluid through a rectangular tube	181
S. D. Bajpai and Manmohan S. Arora	Orthogonality of the laguerre polynomials	189
S. Bandopadhyay	More on semicompact spaces	192
Harold Exton	A theorem on the transformation of multiple *q*-hypergeometric functions	201
B. P. Reddy and M. S. Choudhary	On distributional even generalized legendere transform	205
Samia A. Shehata	On the solution of Mathieu's equation with a sum of step functions	213
D. K. Wagh	Application of convolution integral for determining insulin dose for a diabetic person	220
S. K. Panchal and S. V. More	An alternative method for inversion of finite Hankel transformation of distributions	223
Rehana Quraishi	Geodesic deviation equation in 5-dimension	230
D. S. Veghela and H. S. P. Shrivastava	Magnetogravitational instability of a quasi-homogeneous intersteller gas cloud	235
