CONTENTS

Vol. 19, No. 1 (1997)

Anil Kumar and K. K. Jha	On topological tensor products of strict inductive limits of locally convex spaces	1
R. M. Shankhapal, L. B. Thakur, Ajay K. Harihar and S. R. Patel	On modified algorithm for primal-dual linear programming	7
V. H. Pradhan and A. P. Verma	On imbibition equation in the theory of fluid flow through Porous media : A numerical approach	19
C. L. Parihar and Sanjay K. Harne	On a new class of polynomials	31
P. K. Mandal and M. Gupta	On non-linear parametric interaction of acoustic waves in Piezosemiconductors—A numerical approach	37
H. S. P. Shrivastava	Fractional integrals of the generalized Kampe De Feriet functions and the H-function of two variables	47
Jin Han Park, Bu Young Lee and Mi Jung Son	On δ-semiopen sets in Topological space	59
R. K. Mahalanabis and J. Manna	Eigenvalue approach to the problem of Linear Micropolar Thermoelasticity	69
B. K. Lahiri and Dibyendu Banerjee	Relative fix points of entire functions	87
Murat Ozdemir and Sezgin Akbulut	On the subsheaves of the sheaf of the homology groups	99
Harold Exton	Series of Bessel functions of Neumann type	109
D. C. Sanyal and A. K. Maiti	Unsteady Arterial blood flow with mild stenosis	117
Renu Jain and Deepak Kumar Jain	Thermoregulation in human body for cold environmental conditions	125

CONTENTS

Vol. 19, No. 2 (1997)

K. K. Dube and S. S. Chauhan	Strongly closure semi-continuous mappings	139
G. M. Deheri	Nuclearity of G_∞ -like and G_1-like spaces	149
B. B. Singh and V. J. Bansod	Power-law Fluids Through Straight Channels	157
Kj. Manihar Singh and Naorem Jugeshwor	Exact solutions of radiating and non-radiating viscous fluid universes coupled with an electromagnetic field in general relativity	165
H. S. P. Shrivastava	Expansions for the generalized H-function of two variables in series involving Fourier-orthogonal polynomials	177
Ashok Ganguly, R. K Bose and R. S. Chandel	Fixed point theorems for metrically inward set valued mappings in metric space	193
Ved Prakash and Samir K. Shukla	Harmonic summability of Fourier Laguerre expansion	207
Neelam Pandey	Some bilateral generating relations involving hyper-geometric function of two and three variables	215
Smita Gupta and N. S. Chaudhari	A Primal-dual formulation of general linear programming problem for Karmarkar's approach	223
P. K. Banerji and Deepali Sinha	On the asymptotic representation of Okikiolu operator H_α	231
D. K. Panchal, R. K. Saxena and C. L. Parihar	The generalized Hankel transform of generalized functions and analyticity theorem	239
